

INDEX.

1896.

PARTS 1-2.

ABERNETHY, J., Memoir, 90.

ADAMS, W. A., Memoir, 91.

ADAMSON, J., Remarks on Authority for Borrowing, 27.

ADDRESS BY THE PRESIDENT, E. Windsor Richards, Esq., 106.—Manufacture of iron and steel, 106.—Blast-furnace practice; competition of foreign countries, 107.—British productions and blast-furnaces, 109; Cleveland district, 109; working of blast-furnaces at Eston, 110; at Jarrow-on-Tyne, 111; at Middlesbrough, 112; at Cardiff, 113.—American blast-furnaces, 113; large productions of iron, 114; water-boxes for preserving bosh lines, 114; reduction in size of furnace bricks; size of hearth and bosh; effect of rapidity of driving, 115; Carnegie's new furnaces and blast engines, 116.—Germany and Luxemburg, 117; blast-furnaces at Esch, 117; at Uckange and Ruhrort, 118; Krupp's works at Essen, 119; Hoesch's blast-furnaces at Dortmund, 120.—France, 122; Ferry's furnaces at Micheville, 123.—Belgium, 125; Cockerill furnaces, 125; La Providence, 127.—Cost of fuel, 127.—Iron ores, 128.—Railway rates, 128.—Labour cost, 128.

Laird, W., Vote of thanks to President for Address, 130; foreign competition, 131.—Head, J., Seconded vote of thanks; enterprise of foreign manufacturers, 132.—Richards, E. W., Acknowledged vote of thanks, 133.

ANNUAL GENERAL MEETING, 1.

ANNUAL REPORT OF COUNCIL, 3. *See* Council, Annual Report.

AUDITOR, Appointment, 32.

AUTHORITY FOR BORROWING, Kennedy, A. B. W., Moved resolution authorizing Council to borrow money, 27; Adamson, J., 27; resolution carried, 27.

BAKER, W. H., elected Member, 101.

BARBOSA, A., elected Graduate, 2.

BARKER, A. H., elected Associate Member, 102.

BARKER, M. W., elected Member, 1.

U

- BARR, A., *Paper on Telemeters and Range-Finders for naval and other purposes*, 33.—Remarks on ditto, 59, 61, 74 :—on Marine Horse-Power, 87.
- BARTON, A., elected Associate Member, 2.
- BENARDOS ARC WELDING, 230. *See* Steel Steam-Pipes.
- BOOTH, W. H., Remarks on Steam Superheating, 224.
- BOSLEY, W. J., elected Associate Member, 102.
- BOYS, C. V., Remarks on Range-Finders, 63.
- BRADNEY, W., elected Member, 1.
- BURSTALL, F. W., Remarks on Steam Superheating, 197.
- CARTER, E. T., Remarks on Steam Superheating, 207 :—on Steel Steam-Pipes, 251.
- CHAPMAN, A. C., Memoir, 255.
- CLARK, D. K., Memoir, 92.
- CLEMINSON, J., Memoir, 255.
- CONATY, G., elected Member, 1.
- CONRADI, J. S., elected Associate Member, 2.
- COOK, C., elected Member, 101.
- COOPER, T., elected Associate Member, 102.
- COTTRELL, S. B., elected Member, 101.
- COUNCIL, ANNUAL REPORT, 3.—Numbers of Members, 3.—Honours, 3.—Transferences, 3.—Deceases &c., 4-5.—Financial statement, 5, 12-15.—House for Institution, 6.—Research, 6.—Willans Memorial, 7-8, 16-17.—Donations to Library, 8, 18-26.—Meetings and Papers, 9.—Attendances, 9.—Summer Meeting, 1895, 10; 1896, 10-11.
- Discussion*.—Kennedy, A. B. W., Moved adoption of Report; honours conferred on Sir William Coddington, Bart., and Sir Wm. Thomas Lewis, Bart.; nomination of Professor Unwin as Honorary Life Member, 26.—Motion carried, 26.
- COUNCIL for 1896, 28, 29.
- COX, E. H., elected Associate Member, 102.
- CROSLAND, J. F. L., Motion for re-appointment of Auditor, 32.—Remarks on Steam Superheating, 183.
- CROW, L., elected Graduate, 103.
- DAVEY, H., elected Member of Council, 28.—Remarks on Steam Superheating, 178.
- DAVIDSON, J. M., elected Associate Member, 102.
- DAVSON, S. F., elected Graduate, 2.
- DAWE, J. N., elected Graduate, 103.
- DEVINE, W. H., elected Associate, 2.
- DISTANCE-FINDERS, 33. *See* Range-Finders.

- DONKIN, B., Remarks on Steam Superheating, 194.
 DORMAN, W. S., elected Member, 1.
 DOSSOR, H., elected Associate Member, 2.
 DRONSFIELD, W., elected Member, 101.
 DRYDEN, T., elected Member, 101.
- EBORALL, C. W., elected Member, 1.
 EKIN, T. C., elected Member, 101.
 ELECTION, Council, 28 :—Members, 1, 101.
 ELLIS, W. F. W., elected Member, 1.
 ENGLISH, Lt.-Colonel T., *Paper* on Calculation of Horse-Power for Marine Propulsion, 79.—Remarks on ditto, 87 :—on Steam Superheating, 207.
- FERGUSON, W. D., elected Member, 101.
 FLETCHER, L. E., Remarks on Steam Superheating, 211.
 FROUDE, R. E., Remarks on Marine Horse-Power, 86.
- GALLÉ, W. A., elected Associate Member, 102.
 GALTON, Sir D., re-elected Vice-President, 28.¹
 GEIPEL, W., Remarks on Steam Superheating, 225.
 GLASGOW, A. G., elected Member, 1.
 GODDARD, W. H., elected Graduate, 2.
 GORDON, L., elected Graduate, 103.
 GRAY, A. C., elected Associate Member, 102.
 GRAY, J. W., *Memoir*, 256.
 GREENHILL, A. G., Remarks on Range-Finders, 66.
- HALL, B. J., elected Associate Member, 2.
 HALPIN, D., Remarks on Steam Superheating, 194 :—on Steel Steam-Pipes, 244.
 HARVEY, J., elected Associate, 102.
 HAYES, J., *Memoir*, 94.
 HEAD, A. P., Remarks on Range-Finders, 69.
 HEAD, J., Seconded vote of thanks to President for Address, 132.—Remarks on Steam Superheating, 200, 207.
 HEATH, C. L. E., elected Associate Member, 102.
 HENDERSON, T., *Memoir*, 258.
 HILGER, A., Remarks on Range-Finders, 67.
 HILL, T., elected Associate Member, 102.
 HODGES, M. H., elected Member, 1.
 HODGSON, G. H., elected Graduate, 103.
 HOLLINGSWORTH, E. M., elected Associate Member, 102.
 HOLMAN, F., elected Member, 101.

- HOLMES, P. F., elected Member, 1.
- HOPKINSON, Dr. J., re-elected Member of Council, 28.
- HORSE-POWER FOR MARINE PROPULSION, 79. *See* Marine Horse-Power.
- HOWARTH, A. M., elected Member, 1.
- HOWELL, S. E., Remarks on Steel Steam-Pipes, 244.
- INSTITUTION DINNER, Anniversary, 104.
- JENKIN, C. F., Remarks on Steel Steam-Pipes, 250.
- JENKINSON, T., elected Member, 1.
- JOHNSON, H. H., elected Graduate, 103.
- JOHNSON, S. W., Vote of Thanks to retiring President, 30.
- JOHNSON, T. O., elected Associate Member, 102.
- JOHNSTON, A., Memoir, 95.
- JONES, T. G., elected Associate Member, 102.
- JONES, W. R. S., Seconded motion for re-appointment of Auditor, 32.
- KEEN, A., re-elected Member of Council, 28.
- KENNEDY, A. B. W., Remarks on Annual Report of Council, 26:—on Authority for Borrowing, 27:—on retiring from office of President, 29.—Reply to vote of thanks, 31.—Remarks on Steam Superheating, 164.
- KITSELL, A. E., elected Graduate, 103.
- KITTO, W. H., elected Associate, 2.
- LAIRD, W., re-elected Member of Council, 28.—Proposed vote of thanks to President for Address, 130.
- LANE, F. L., elected Member, 101.
- LAWSON, H. J., elected Associate Member, 102.
- LEISSE, G. C., elected Member, 101.
- LONGRIDGE, M., Remarks on Steam Superheating, 169.
- MACCARTHY, S., *Paper* on Steel Steam-Pipes and Fittings, and Benardos Arc Welding in connection therewith, 230.—Remarks on ditto, 243, 252.
- MAIN, W. H., elected Member, 2.
- MAIR-RUMLEY, J. G., re-elected Member of Council, 28.
- MALLOCH, W. F., elected Associate Member, 102.
- MALLOCK, A., Remarks on Range-Finders, 61.
- MANSFIELD, A., elected Associate Member, 2.
- MARINE HORSE-POWER, *Paper* on Calculation of Horse-Power for Marine Propulsion, by Lt.-Colonel T. English, 79.—Calculation based on Froude's law of resistance at corresponding speeds, 79.—Principle, 80.—Apparatus, 81.—Example of determination of horse-power required for torpedo-

destroyer designed on lines of existing vessels, 83.—Extension of method to determine horse-power for vessel of same displacement and same speed, but on different lines, 85.

Discussion.—Froude, R. E., Elements of variation in resistance of models; distance apart of models, 86.—Barr, A., Instability of lever for towing models; wooden or wax models, 87.—Robinson, L. S., Horse-power calculated from experiments, 87.—English, Lt.-Col., Distance apart of models, 87; diagonal cords preventing models from coming too close together; wooden models; calculated horse-power sufficient; objection to counter-model not representing ship of known horse-power, 88.—Richards, E. W., Vote of thanks for paper, 89.

MARINE PROPULSION, Calculation of Horse-Power, 79. *See* Marine Horse-Power.

MARSH, D. E., elected Member, 2.

MARSHALL, F. C., elected Vice-President, 28.

MARTIN, E. P., Seconded vote of thanks to retiring President, 30.

MARTIN, T. G., Memoir, 258.

MAW, W. H., elected Vice-President, 28.

MCCORMACK, W. J., elected Associate Member, 102.

MCLEAN, R.A., re-appointed to audit Institution accounts, 32.

MCPEAIL, H., Remarks on Steam Superheating, 181, 208.

MCPHERSON, S., elected Member, 101.

MEETINGS, 1896, Annual General, 1.—Spring, 101.

MEIK, T., Memoir, 96.

MEMOIRS of Members recently deceased, 90, 255.

MORLEY, H. W., elected Member, 102.

MUDD, T., elected Member of Council, 28.

NEW, D. J., elected Associate Member, 102.

NICHOLS, P., elected Associate Member, 2.

NORTH, J. T., Memoir, 259.

PATCHELL, W. H., *Paper* on Steam Superheating, 134.—Remarks on ditto, 161, 185, 218, 228.

PATEL, M. B., elected Associate Member, 102.

PATEL, R. M., elected Associate Member, 102.

PERRETT, E., Remarks on Steam Superheating, 199, 200.

PHILLIPS, J., Remarks on Steam Superheating, 193.

PINEL, P. G. M., elected Graduate, 103.

PIRRIE, J. S., Memoir, 97.

PLATT, J., Remarks on Steel Steam-Pipes, 247.

PRESIDENT'S ADDRESS, 106. *See* Address by the President.

PRICE, J., elected Member, 102.

PRITCHARD, H., elected Associate Member, 102.

PYROMETER, Electrical Platinum, 155, 164, 197, 221. *See* Steam Superheating.

RANGE-FINDERS, *Paper* on Telemeters and Range-Finders for naval and other purposes, by Professors Barr and Stroud, 33.—Telemeters and range-finders in general, 33.—Principle of telemeters, 33; short-base single-observer range-finder, 34.—Alignment, 35.—Limits of accuracy attainable, 36.—Methods of producing alignment, 39.—Optical details of naval range-finder, refracting prism, 40; scale, 41; reflectors, 43; eye-piece prism combination, 45; astigmatiser, 46.—Mechanical details, frame, 47; case, 49; supports of frame-work, 50; gear, 51; adjustments, 53; electric lamp, stand, 55.—Uses for gunnery and navigation, 55.—Hand distance-finder, or portable single-observer range-finder, 57.

Discussion.—Barr, A., Method of using naval range-finder, 59; its accuracy and permanency, 60.—Mallock, A., Eye-piece prisms, 61.—Barr, A., Magnifying power, 61.—Mallock, A., Defining power of telescope, 61; division of image, 62; Mallock range-finder, 63.—Boys, C. V., Double-prism eye-piece, 63; defining power of lens, 64; refracting prism of small angle, 65.—Greenhill, A. G., Time occupied in finding range, 66.—Hilger, A., Manufacture of prisms, 67; quality of glass, and magnifying power, 68.—Wicksteed, J. H., Length of scale, 69.—Head, A. P., Angle of field of view; hand distance-finder, 69; box-sextant for land observer, 70.—Stroud, W., Length of scale; range-finding for objects in motion; eye-piece prism combination; travelling prism for producing optical shift of image, 71; accuracy of instrument, 72; size of aperture of telescope field; Mallock telemeter; overlapping images, 73.—Barr, A., Use of range-finder in rough weather, 74; comparison of observed and verified distances, 75; physical limitations to resolving power of telescopes, 76; experiments on alignment of separated and overlapping images, 77; graduation of scale, 78.—Richards, E. W., Vote of thanks for paper, 78.

RAWORTH, J. S., Remarks on Steam Superheating, 175.

RAYNER, H. S., elected Associate Member, 102.

REPORT OF COUNCIL, 3. *See* Council, Annual Report.

RICHARDS, E. W., elected President, 28.—Remarks on taking office as President, 29 :—on vote of thanks to retiring President, 31 :—on Range-Finders, 78 :—on Marine Horse-Power, 89.—*Address* at Spring Meeting, 106; *see* Address by the President.—Acknowledgment of vote of thanks, 133.—Remarks on Steam Superheating, 185, 199, 223 :—on Steel Steam-Pipes, 252, 254.

ROBINSON, L. S., Remarks on Marine Horse-Power, 87.

ROBINSON, M., Remarks on Steam Superheating, 207 :—on Steel Steam-Pipes, 249.

SAÏD, Marshal M., Memoir, 97.

SAMUEL, B. L., elected Associate Member, 2.

SCANLAN, H. E., elected Associate Member, 102.

SCHÖNHEYDER, W., Remarks on Steam Superheating, 217 :—on Steel Steam-Pipes, 243.

SCRIVEN, C., elected Member, 102.

SEDDON, R. B., Memoir, 99.

SHAPTON, W., Memoir, 260.

SIMPSON, N. DE L., elected Graduate, 103.

SPRING MEETING, Business, 101.

STEAM-PIPES, Steel, and Benardos Arc Welding, 230. *See* Steel Steam-Pipes.

STEAM SUPERHEATING, *Paper* by W. H. Patchell, 134.—Nature of steam superheating, 134.—Aim of superheating; early attempts at superheating, 135; more recent efforts, 136.—Reasons for former abandonment; present elimination of old hindrances to successful application, 137.—Re-introduction of superheating apparatus; Gehre's superheater, 139.—Musgrave and Dixon's, 140.—McPhail and Simpsons', 142.—Induced draught by fan, 153.—Schwoerer's superheater, 156.—Sinclair's, 159.—Amount of superheat, 159.

Discussion.—Patchell, W. H., Increased evaporation with superheater; later tests of Schwoerer and of McPhail superheaters, 161.—Kennedy, A. B. W., Sinclair superheaters at Edinburgh electric lighting station, 164; platinum thermometers, 164; saving effected, 165; tabulated results of tests, 166; covering of steam-pipes, boilers, and flanges, 168; early marine engines with superheaters, 168; duty per cubic foot of boiler house, 168.—Longridge, M., Degree of superheat to be aimed at, 169; mode of obtaining desired superheat, 171; tabulated results from four kinds of superheaters, 172-3; proper place for superheater, and head of temperature necessary, 174; rate of heat transmission, 175.—Raworth, J. S., Coal economy with superheater, 175; superheated steam more economical than saturated, 176; McPhail superheater mainly an addition to boiler power, 177; existence of water in presence of superheated steam, 178.—Davey, H., Superheating economical but difficult, 178; effect on engine economy, 179; superheat from waste heat of boiler, 180; high superheat for preventing initial condensation, 181.—McPhail, H., Superheater controlled by boiler pressure with regular firing, 181; uniform temperature ensuring dry steam, 182; superheated steam remains dry below temperature of saturation, 182; no sediment in superheating

tubes, 183.—Crosland, J. F. L., Early form of superheater, and difficulty in lubricating engine, 183; economy resulting from superheat; efficiency of McPhail superheater, 184.—Patchell, W. H., Evaporation from water-tube boilers; advantage gained by superheating, 185; freedom from scaling of superheater tubes, 186.—Unwin, W. C., Three ways of using steam, 186; economy from superheated steam is an engine gain, 187; ancient superheating, 188; boiler economy and engine economy, 189; chimney waste; action of McPhail superheater, 190; calculation of evaporation, 191; regulation of temperature of superheated steam, 192; economy from superheating, in steam and in coal, 193.—Phillips, J., Wethered's combined steam, 193.—Unwin, W. C., Wethered's plan, 194.—Halpin, D., Date of ditto, 194.—Donkin, B., Reasons of economy of superheated steam, 194; reported experiments, 196.—Burstall, F. W., Platinum thermometer, 197.—Perrett, E., Experimental engine with superheated steam, 199.—Richards, E. W., Temperature of superheated steam, 199.—Head, J., Boulton superheating engine, 200; tabulated results of trials, 202-5; fire-brick regenerative superheater, 206.—Carter, E. T., Water-gas from fire-brick superheater, 207.—Head, J., Absence of evidence, 207.—English, Lt.-Col. T., Dissociation of steam, 207.—Robinson, M., Heat-units from fire-brick superheater, 207.—Head, J., Records of experiments, 207.—McPhail, H., Freedom from risk in superheating, 208; automatic regulation of temperature; action of superheater, 209; radiating pipes of steel, 210; effects of sending superheated steam direct to engines, 211.—Fletcher, L. E., McPhail's and Musgrave's superheaters, 211; tabulated tests of Musgrave's superheater, 212-15; saving effected, 216.—Schönheyder, W., Separate furnace for superheater; deterioration of superheater pipes, 217.—Patchell, W. H., Economy from superheating dry steam, 218; efficacy of small degrees of superheating; regulation of temperature; cold feed, 219; Schworer superheater tests, 220; gain from McPhail superheater; Burstall pyrometer, 221; experimental engine with fire-brick superheater; early use of combined steam, 222; position for superheater; freedom of pipes from deterioration, 223.—Richards, E. W., Vote of thanks for paper, 223.—Booth, W. H., Superheater pipes; increase in boiler capacity by superheating; Solignac boiler, 224; superheating prevents loss from wetness of steam, 225.—Geipel, W., Superheating less economical for high-speed than for low speed, and for multiple-expansion than for single-cylinder engines, 225; loss by radiation and conduction, 227; rate of coal consumption, 228.—Patchell, W. H., Evil effects of simple flue superheater; superheat by wire-drawing is merely nominal; mixed superheated steam, 228; rate of evaporation, 229.

STEEL STEAM-PIPES, *Paper* on Steel Steam-Pipes and Fittings, and Benardos Arc Welding in connection therewith, by S. MacCarthy, 230.—Cast-iron and copper pipes, 230; wrought-iron and steel pipes, 231.—Corrosion, 231.—Thickness of metal, 232.—Methods of manufacture, 233.—Roll welding; gas welding, 231.—Benardos arc welding, 235; flanges, outlets, branches, and tee pieces, 236; bends and expansion pipes; length and size of arc; strength of electric-welded flanges, 237.—Other applications of arc welding, 238.—Joints; bolt holes, 239.—Experiments on electrically welded bars, 239-242.

Discussion.—MacCarthy, S., Specimens of arc-welded steel pipes &c., 243.—Schönheyder, W., Sharp corners inside welded pipes, 243.—Halpin, D., Joint for high-pressure steam-pipes, 244.—Howell, S. E., Electric soldering; tests of welding of steel tubes by rolls, 244; electric-welded and gas-welded bars, 245; welding of flanges; corrosion of steel, 246.—Platt, J., Seamless pipes drawn cold from solid ingots, 247; arc welding for steel castings; flanges shrunk on and riveted over, 248; copper ring for pipe joint, 249.—Robinson, M., Experiments with lap-welded and weldless steel tubes, 249; copper rings for pipe-joints and flanges, 250.—Jenkin, C. F., Tests with Thomson electric welder, 250.—Carter, E. T., Electric welding is not mere soldering or fusion; cost of electric and ordinary welding, 251.—Richards, E. W., Length of pipe welded, 252.—MacCarthy, S., Corners left inside welded joints; joints for steam-pipes, 252; soundness of electric welding; roll-welded steel tubes; corrosion; solid-drawn pipes, lap-welded and weldless tubes, 253; screwed collars or flanges for pipe-joints; cost of welding, and length of welded pipes, 254.—Richards, E. W., Reliable steam-pipes, 254.

STEWART, C. N., elected Associate Member, 2.

STOBART, H. G., elected Associate Member, 102.

STROUD, W., *Paper* on Telemeters and Range-Finders for naval and other purposes, 33.—Remarks on ditto, 71.

SUPERHEATING STEAM, 134. *See* Steam Superheating.

TAYLOR, J. H., elected Associate, 2.

TELEMETERS AND RANGE-FINDERS, 33. *See* Range-Finders.

THERMOMETER, Electrical Platinum, 155, 164, 197, 221. *See* Steam Superheating.

TROM, F., elected Graduate, 2.

THOMAS, J. M., elected Member, 102.

TIPPING, H., Memoir, 99.

TOONE, W. C., elected Member, 102.

TRAFFORD, A., elected Associate Member, 2.

TROTTER, A. P., elected Member, 102.

UMNEY, H. W., elected Associate Member, 2.

UNWIN, W. C., nominated Honorary Life Member, 26.—Remarks on Steam Superheating, 186, 194.

VAIZEY, J. L., Memoir, 260.

VALLINT, F. W., elected Associate Member, 102.

VOTE OF THANKS, to retiring President, 30-31 :—to Institution of Civil Engineers, 32, 104 :—to President for Address, 130.

WALKER, A. T., elected Member of Council, 28.

WATSON, J. F., elected Member, 102.

WELDING, Benardos Arc, 230. *See* Steel Steam-Pipes.

WHEELER, P., elected Member, 102.

WICKSTEED, J. H., Remarks on Range-Finders, 69.

WILCOX, F. W., Memoir, 100.

WILLIAMSON, J., elected Member, 102.

WISEMAN, A., elected Associate Member, 2.

WOOD, W. C., elected Member, 2.
